15 October 1970

Section I (Briefings)

None Scheduled.

Section II (Approval of Minutes)

COMIREX-M-105, M-106, and M-107

1. COMIREX-M-105 and COMIREX-M-106 covering the regular meetings of 3 and 17 September 1970 were approved. Since COMIREX-M-107 had not been available for review prior to this meeting, it was agreed that approval would be implied if no comments were called in to the Executive Secretary, by c. o. b. Wednesday, 21 October.

Section III (Operations)

25X1A 25X1A

Satellite Schedule

C,  T-KH)

25X1A  
1. [REDACTED] distributed copies of the satellite operations schedule as of 15 October 1970. A copy is attached at Tab A.

Section IV (Action Items)

25X1A 25X1A

Consideration of Draft Report for USIB--Review of Imagery Satellite Schedule and Coverage Prospects FY 71 and Beyond  
(COMIREX-D-14.6/3A and COMIREX-D-14.6/3B) [redacted] T-KH,C, [redacted]

25X1A

1. [redacted] explained that he hoped primarily to effect coordination today on the portions of subject report distributed at last week's special meeting (COMIREX-D-14.6/3A). He noted that additional materials, including a draft cover memorandum and certain revised sections of the study reflecting data provided by the NRO last week on flexibility factors and supplemental platforms (COMIREX-D-14.6/3B), had been distributed just prior to the opening of today's meeting. No attempt would be made to coordinate these at this session. He would, however, solicit general views on the points discussed in the covering memorandum.

2. The Chairman felt it would not be productive to attempt a line-by-line review of the basic study for editorial changes. He asked members, however, to identify any inaccuracies, disagreements in emphasis, qualifications that should be made, or areas that require clarification as the major sections were reviewed. There were still portions of the study incomplete, such as the need for additional discussion of an interim capability for imagery satellite coverage during crisis situations.

25X1A

3. [redacted] stated he would verify historical data presented in the study. He did not feel, however, that the NRO could formally concur in the selection of options or the conclusions reached, since these were matters of COMIREX discretion for this study. Stressing that neither USIB nor COMIREX ever expected that the NRO would be held responsible for conclusions reached in the study, the Chairman said there was a definite requirement for the NRO to either validate the background data included or indicate appropriate revisions in order that USIB members might have a correct understanding of the factors affecting flexibility and what options may be feasible. [redacted] noted the options

25X1A

presently covered in the paper would not necessarily represent all of the alternatives potentially available. Hypothetically, a wide range of option combinations and trade-offs exist. They can only be firmly delimited and precisely identified in terms of a specific requirement. The NRO had, therefore, provided information only on the particular range of options requested. The Chairman observed he has operated on the assumption that the NRO Consultant and the NRO Staff, in looking at problems COMIREX is addressing, would use judgment and initiative to provide any information that is clearly relevant whether or not specifically asked for. [Redacted] replied that, since the COMIREX study is designed as a general survey, the NRO has furnished information on options or alternatives that are currently available "on the shelf". Once a specific problem is firmly defined, it might be possible to submit specifications to a number of contractors who would then be able to develop additional alternatives.

4. With regard to the draft cover memorandum, the Chairman emphasized it must be made clear that the basic question is not one of cost and benefits of an interim system as opposed to a near-real-time system, but rather whether there are any additional interim measures that can be developed to provide some crisis coverage insurance until the introduction of a near-real-time system. Another point to be included is a statement indicating the direction of the NRO's system development efforts with respect to search, surveillance, and timeliness has been fully responsive to USIB requirements. Further, it must be made clear that USIB has not expressed a requirement for the kind of interim crisis capability that is being addressed in this paper. USIB did consider the crisis response problem in July 1969 and at that time established the requirement for development of a near-real-time system. The Board did not then, however, nor has it since, formally levied a requirement for any limited capability interim system.

25X1

TOP SECRET

COMIREX-M-109  
15 October 1970

25X1

5. It was also necessary to recognize that there exists in the short term certain unique problems with regard to imagery satellite crisis coverage about which little could be done at this time. In the period beyond the next 18 to 24 months, however, until the availability of near-real-time in 1975, there are gaps which conceivably could be filled by a system or

25X1D

[REDACTED]

to evaluate what combination of system characteristics, availability time, and cost might satisfy an interim requirement. Mr. Moyer agreed the paper must recognize this problem but should not attempt to advocate procurement of any particular system. It was agreed that sufficient information and guidance are not yet available to address a specific interim requirement.

6. The DIA representative commented on the importance of insuring that findings in the cover memorandum correlate with the facts presented in the basic study. In this regard, [REDACTED] observed that the tables and text of the study will also be closely checked to assure consistency and accuracy in the final version. A major problem still to be worked out with the NRO, however, is that of developing a realistic and practical presentation of future launch schedules.

25X1A

7. Colonel Wayne raised the point that the Committee's report must be responsive to both aspects of concern to Dr. Cline, and address not only crisis coverage but also fulfillment of the search requirement. The Chairman noted that the paper attempted

25X1

Approved For Release 2003/02/27 : CIA-RDP79B01709A000900070003-4

TOP SECRET

COMIREX-M-109

25X1

to do this. As to adequacy of search, for example, the

NRO  
25X1

NRO  
25X1  
NR  
25X1

8. Members' comments on various aspects of the draft included suggestions for added information, acknowledgement of the expectation that any system will have a failure from time to time, and explanation of the methodology for accounting accomplishment. It was also agreed that, insofar as possible, the paper should reflect the best practical estimate of dates for [redacted] system launches. The Chairman said these dates would be held open until final typing and, if necessary, would be prefixed by an appropriate qualifying phrase to reflect the fluid situation existing.

NRO  
25X1  
NRO  
25X1

9. There was agreement to include a statement on the fact that the CCRP

[redacted] referred to the NRO preference for winter or summer missions based on the optimum season for a particular system to be launched.

[redacted] the requirement for continuity of coverage and the opportunity to have a satellite on orbit at regular intervals remain overriding considerations.

25X1A

10. With regard to defining nominal, best, and worst- cases for comparative purposes, [redacted] noted these must of

25X1

Approved For

TOP SECRET  
Release 2003/02/27 : CIA-RDP79B01709A000900070003-4

25X1

necessity be based on some arbitrary assumptions. He asked the NRO to review the comparative situations discussed in the draft to insure they were realistic and represented a fair presentation of the outlook.

25X1A

11. In closing, [redacted] noted that in view of the pressing need to have the final report forwarded to USIB as soon as possible, it would be difficult to circulate another complete draft of the basic study for detailed coordination. He invited continuing participation by the members in the drafting and review process going on in his office. They should forward or telephone any comments or inputs as soon as available and were invited to visit his office at any time to review any portion of the draft. He asked that members, after they have had an opportunity to review the sections of the study distributed today, notify [redacted] if they felt a meeting on them would be necessary. In any case, a special meeting would be scheduled early next week for detailed review and coordination of the covering memorandum. The series of tables being prepared as an annex to the basic study probably will not be sent out for coordination since they are factual and intended solely for background reference.

25X1A

Draft Program for Planning Exploitation FY 1973-1977  
(COMIREX-D-31.5/5B) (T-KH)

12. The Executive Secretary noted that the format and content of the initial draft for the Program for Planning Exploitation FY 1973-1977 are similar to those employed in previous years. Members are asked to study the draft and consider the extent to which it is responsive to the charge placed on COMIREX under the National Tasking Plan.

25X1A

13. [redacted] commented on the usefulness of this document, which, at the T-KH level, indicates [redacted]  
[redacted] number of launches expected during each fiscal year.  
[redacted] cautioned that the mission projections are estimates for use in long-range planning for exploitation and

should not be considered as actual launch schedules. Other data will be provided separately for short-term (FY 72) planning purposes.

25X1A

14. [Redacted] noted that the [Redacted] information included in the draft had been provided by the NRO and authorized for use at the T-KH level. [Redacted]

NRO  
25X1  
25X1  
NRO

[Redacted] He also pointed out that a text for Section III (Basic Exploitation Program) of the draft was not yet available since work on the basic program was still under way in EXSUBCOM.

25X1A

15. The CIA Member queried as to the proposed timing for action on the paper. [Redacted] explained there are two categories of potential customers for the information. One, the working managers in the exploitation community, will already have advance access to the compiled data as a result of the draft distribution. The other is USIB itself. The NTP charge is that COMIREX will forward to USIB for approval by 1 October of each year "... a 'Program for Planning the Exploitation of Reconnaissance Imagery' for five fiscal years in the future...." Although the Committee early this year coordinated a document on this subject covering FY 1971-75 (COMIREX-D-31.5/4), it was not felt to have met the requirement expressed in the National Tasking Plan and was not forwarded to the Board. Cumulative statistical data was not available at that time to permit development of a meaningful five-year projection. (See COMIREX-M-86, pages 10 and 11.)

16. Members were asked to review the draft and attached extracts from the NTP. Further discussion on this item would be scheduled for a subsequent meeting.
